DETAILED ACTION

1. Claims 1-27 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to objects organized into a web browser display of a tree structure with expandable linked nodes. Each independent claim identifies the distinct feature of the display to further comprise an "array comprising information describing each of the objects to be displayed" and a "string comprising information describing a hierarchical structure of expanded nodes in the tree".

The closest prior art, Banning and Screen Dumps of Microsoft Windows NT, when combined, shows a similar system, one that also provides objects organized into a tree structure with expandable linked nodes displayed over the network. However, the prior art still fail to anticipate or render the above underlined limitations obvious, i.e. objects organized into a web browser display of a tree structure with expandable linked nodes comprising exactly, one array that holds the description of each of the objects and one string that holds the hierarchical structure of only those nodes which are to be expanded.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
